Sezione descrittiva

Descrizione attività svolta

The first workshop for “Simulation of a coherent decision making process around the National Strategy for Sustainable Development: Institutional dialogue for more coherent policies in the area of Prosperity” promoted by OECD and Minister of Environment in the area of the project for “Policy coherence for sustainable development: mainstreaming the SDGs in Italian decision making process” took place in the days of 16 and 17 december on Zoom platform. The participant from Italian Government were about 30 from Cabina di Regia Benessere (Steering Committee Well-Being Italia) within the Presidency of the Council of Ministry (PCM), Dipartimento per la programmazione e il coordinamento della politica economica DIPE (Department for programming and coordinating economic policies) within the PCM, Department for territorial cohesion within PCM, Ministry of Foreign Affairs and International Cooperation MAECI, Ministry of Economy and Finance MEF, Department of European Policies within the PCM, Regions, Metropolitan cities, Civil Society Forum, all Line ministries and responsible entities. For OECD side, the participants were from GOV/PCSD, CFE/City, OSG/Policy Foresight, WISE. The objective of workshop was “simulating a decision making process around specific sectoral issues in order to identify what would be useful for enhancing policy coherence in Italy. The meeting picks one of the five Area of the SNSVS and works around the “Strategic Choices” therein. Building on inputs received so far, the chosen Area is Prosperity with its four “Strategic Choices”: I. Finanziare e promuovere ricerca e innovazione sostenibili, II. Garantire piena occupazione e formazione di qualità, III. Affermare modelli sostenibili di produzione e consumo, IV. Decarbonizzare l’economia. The debate focalized also at territorial level as activated by MATTM and the other central administration, as well as of

the recent European/National programming instruments including the Green Deal and the NGUE. An analysis of the policy tools associated with the Strategic Choices has been conducted with a view to understand whether, if and how, those instruments have contributed to achieve the strategic vision and if they need to be updated. It has also been investigated whether those policy instruments have fostered cross sectoral synergies and dialogue among the responsible institutions around these “Strategic Choices”. The scope of such analysis is to take stock of the current tools and decision-making mechanisms, and to discuss options to foster policy coherence that could be included in the PCSD action plan.

The workshop represents a contribute to identify, consolidate, improve or update existing policy coherence mechanisms to be included in the PCSD Action Plan due by 2021. It was asked a short pre-workshop survey, to allow participants to choose one Strategic Choice and two Strategic objectives out of the one listed in the area Prosperity of the SNSVS based on their level of priority and cross-sectoral nature. The work of the workshop took two days:

- day 1 (December 16th) - part 1 was opened by Oliviero Montanaro (MATTM DG CRESS). Then, the Introduction by MATTM: Setting the scene - Leonardo Becchetti, Piergiuseppe Morone (MATTM); after this intervention, Practices for policy coherence in the context of the National Sustainable Development Strategy have been presented. So it was the turn of the “Territorial Point of view” given by Regional and Metropolitan areas and authorities from 9th december 2020. At the end of this session, the joint work of the Department for Territorial Cohesion of the PCM and the MATTM in tracking Cohesion

policy's contribution to the achievement of the SDGs and outline results at territorial level (DIPCoE) was presented. The part 2 of the day, regarded the work on Policy foresight with 2 hours of workshop through OECD presentation of tools for policy foresight and approaches for identifying plausible future scenarios. During the break-out sessions, OECD moderators divided participants into four working groups around the four Strategic Choices within the area of Prosperity of the SNSVS that have been selected for the workshop. The objectives of workshop time were: Identifying potential disruptions/incertitudes in the next 10 years to the global and local context related to the Strategic Choice that the group was discussing; Identifying potential steps for being better prepared to those disruptions, 'no-regrets' strategies and actions (2030) that you can prepare around that Strategic Choice; Identifying the current or potential evaluation and policy mechanisms that you use for anticipating the challenges in the implementation of policies associated to the Strategic Choice and revising them. The day1 ended with the Restitution from the rapporteurs to the participants. The arch. PhD G. Mangano (collaborator of ABITaLab dArTe Uniirc, partner of the project "RCMetroCitizens in Transition" with MATTM and Metrocity Reggio Calabria), was included in the group C "Reduce waste production" giving a contribute illustrating how the SNSvS collaborates with the goal 11 of Agenda2030 in order to abate and manage waste for the wellbeing in the cities;

- day 2 (Decemeber 17th) focalized on the Simulation of a coherent decision making process around the SNSVS Prosperity Area. At the beginning, the OECD

representants showed key tools for Policy Coherence for Sustainable Development (PCSD) as foreseen in the OECD recommendation and introduction to the group work. At the break-out session, the working groups identified with MATTM, civil society, territories, central administrations, debated on the on Italian governance practices and policies related to the Strategic Choice of their group.

The objectives of the working group were to identify cross-sectoral and cross-level mid-term actions, synergies and trade offs among sectoral strategies that help pursue the 10, 5 and 1 years actions identified, contingency planning to anticipate/address foresight/alternative futures, KPIs/M&E frameworks to measure baseline and, finally, which ministries/SNGs/Agencies and non-state actors collaborate to achieve the objectives.

The arch. PhD G. Mangano took part in the group A "Dematerialize the economy" and had the occasion to share the experience of the project "RCMetro Citizens in Transition" and the opportunity given by digital instruments (as the project's platform) and the collaborative network established with the civil and educational ecosystems. The two days of workshop have ended with the restitution of the rapporteurs to the participants.

Azione pilota 2
LEARNING METROCITY OUT

CATEGORIA DI INTERVENTO
A - Costruzione della governance delle agende metropolitane per lo sviluppo sostenibile

SOTTO-CATEGORIA
A2 - Coinvolgimento delle istituzioni locali

L'azione pilota 2 "Learning MetroCity Out" intercetta tutte le cinque aree Persone, Pianeta, Prosperità, Pace e Partnership della SNSvS - Strategia Nazionale per lo Sviluppo Sostenibile.

VETTORI DI SOSTENIBILITÀ

I. Conoscenza comune

- Obiettivi trasversali
- I.1 Migliorare la conoscenza sugli ecosistemi naturali e sui servizi ecosistemici
 - I.2 Migliorare la conoscenza su stato qualitativo e quantitativo e uso delle risorse naturali, culturali e dei paesaggi
 - I.3 Migliorare la conoscenza relativa a uguaglianza, dignità delle persone, inclusione sociale e legalità
 - I.4 Sviluppare un sistema integrato delle conoscenze per formulare e valutare le politiche di sviluppo
 - I.5 Garantire la disponibilità l'accesso e la messa in rete dei dati e delle informazioni

II. Monitoraggio e valutazione di politiche piani e progetti

- Obiettivi trasversali
- II.1 Assicurare la definizione, la realizzazione e l'alimentazione di sistemi integrati per il monitoraggio e la valutazione di politiche, piani e progetti
 - II.2 Realizzare il sistema integrato del monitoraggio e della valutazione della SNSvS, garantendone l'efficacia della gestione e la continuità dell'implementazione

III. Istituzioni, partecipazione e partenariati

- Obiettivi trasversali
- III.1 Garantire il coinvolgimento attivo della società civile nei processi decisionali e di attuazione e valutazione delle politiche
 - III.2 Garantire la creazione di efficaci meccanismi di interazione istituzionale e per l'attuazione e valutazione della SNSvS
 - III.3 Assicurare sostenibilità, qualità e innovazione nei partenariati pubblico-privato

IV. Educazione, sensibilizzazione, comunicazione

- Obiettivi trasversali
- IV.1 Trasformare le conoscenze in competenze
 - IV.2 Promuovere l'educazione allo sviluppo sostenibile
 - IV.3 Promuovere e applicare soluzioni per lo sviluppo sostenibile
 - IV.4 Comunicazione

V. Modernizzazione della pubblica amministrazione e riqualificazione della spesa pubblica *Obiettivi trasversali*

- Obiettivi trasversali
- V.1 Rafforzare la governance pubblica
 - V.2. Assicurare la semplificazione e la qualità della regolazione
 - V.3 Assicurare l'efficienza e la sostenibilità nell'uso delle risorse finanziarie pubbliche
 - V.4 Adozione di un bilancio di genere
